

2017 GATEWAY CHALLENGE

To benefit Manatee District Day Camp

Attention all Troops!! You are invited to participate in a rewarding service project that we think will be the first of many to come!

Scouts are impressed by well-built, pioneering structures. Tall gateways, strong bridges, or clever camp gadgets are found to be especially exciting when experienced outdoors during a Scout gathering like this year's 2017 Camporee this past weekend. The attraction is even more pronounced in those Scouts who would love to have the chance to get involved firsthand in the challenge and the fun. This is an opportunity to harness your skills in pioneering for your units and help this year's day camp staff create amazing gateways to each of the eleven program areas we will have. Rules of the game: We will be emailing specific instructions and requirements for the building, size and construction of the gateways once all slots are full. Don't worry, from what I could see at Camporee, you guys already have what you need.

There will be eleven program areas that are available on a first come first serve basis.

The planks for each area with their location will be provided for you.

As I said, there will be more to come on this very soon. We hope you will jump right in and be as excited as we are to see this project come to life!!! To sign up now, please see Lisa at Thursday night's rountable!!
